

Fairing (CFRP stringer) end-to-end on REAL Open-Guided-Waves data: detect → classify → characterise are real; prognosis is honestly synthetic

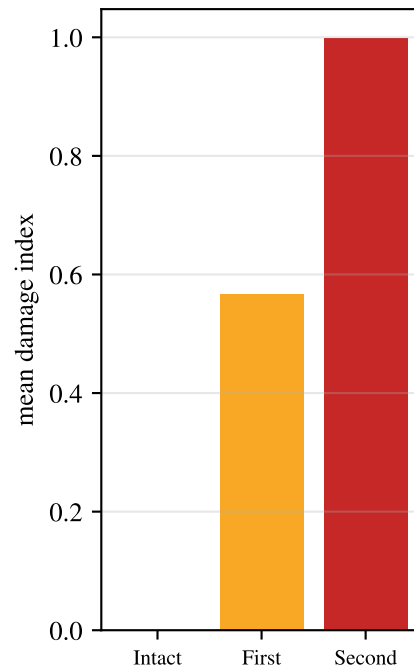

(a) Stage 0 detect — REAL long-term GW
(34 months, large-N; temp confound → DA, §9)

(b) Stage 1/2 — REAL stringer damage index
(detect+classify+localize: which paths light up)

(c) Stage 2 severity
REAL monotone progression

(d) honest real-data coverage
